

I started seeing Dr. Murthy in 2010. I had always wanted to improve my smile and bite. Orthodontics was not popular in China when I grew up. But at the age of 33, I know that going through a full orthodontic treatment was a very committed decision. Indeed, the first couple of months were challenging. Luckily, I had Dr. Murthy by my side; he and his staff tried their best to lessen my pain and make my experience more pleasant. During each visit he patiently explained the procedure and helped me make informed decisions. Looking back, I probably would have given up without his warm encouragement along the way. After two years of treatment, I finally got the smile I longed for and couldn't be more pleased with the results! I recommend Dr. Murthy to all my friends who want perfect teeth. Dr. Murthy and his staff operate with high standards. You can always expect the best from them! I also especially appreciate their flexibility. When I had to reschedule my appointments, they were always happily accommodating my requests and made me feel less guilty. Everyone at the clinic was so welcoming that it was the only place I could smile big without worrying about showing the braces!
